Complex ISP vendor
landscape

Lack of WAN
insight & control

Business Challenges

- Need for a more agile and flexible WAN
- Increasing bandwidth requirements
- Need to optimize WAN costs & reduce TCO savings

- Dissatisfaction with current provider & vendor lock-in
- Lack of internal resources/skills
- Managing complexity at a global scale
- Limited self-service & automation options

Global Connectivity Solutions

Changing times demand real change, and we love doing things differently. With a transparent and carrier-neutral approach, we provide enterprises with internet and private connectivity solutions to connect their sites, clouds, and DCs in 190+ countries, all under a single contract, invoice, and support contact.

GNX Straightforward

Global Internet Access

DIA, Business Broadband, Mobile

Point-to-point

Layer 2, Ethernet, Wavelength, Dark Fiber

Cloud Fabric

Interconnect services to public & private clouds

Business benefits

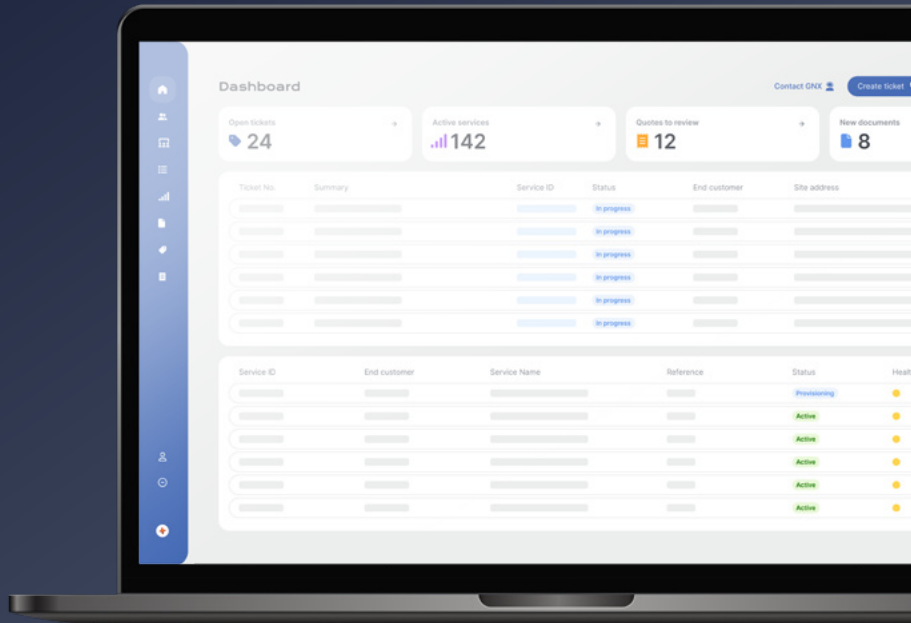

- All your connectivity in one single contract/invoice
- Access to GNX network of 1,500+ ISPs via our carrier-neutral platform
- Solution-focused service design
- An extensive portfolio of SLA-backed internet and private connectivity
- A cost-effective, more flexible underlay for your SD-WAN deployments
- 24/7 network monitoring & support

More than a connectivity platform

GNX customers have instant access to GNX+, our carrier-neutral automated platform, to support you along your entire connectivity journey.

- + Search, find, quote, and compare services and prices from competing local and global vendors
- + Order services directly for all your sites
- + Lifecycle Management: MACD, renewals, service review, end-of-life management
- + 24x7 support, monitoring, and incident management
- + Flexible invoice solutions (one currency or multiple).
- + API and e-bonding integrations with your own platforms
- + And more...

About GNX

At GNX, we are transforming the way enterprises navigate global connectivity – from procurement to service assurance and everything in between.

How do we do this? We bring our carrier-neutral portfolio and transparent approach to our automated platform, GNX+, enabling customers to source, buy, deploy and manage global underlay services in 190+ countries with just a few clicks, while relying on our team's expert advice and 24/7 NOC for real-time monitoring and support.
